Exclusive distributor for Latin America

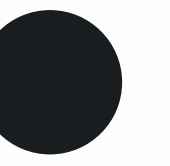

3 **Ioawa SA CV**
Wastewater treatment plants
Desing, construction and maintenance operation
Consulting
Equipment

6 **CMK Global Enterprise**
Commercialization of products and services for the
construction industry.

development and success of our members...

Envipro is a company founded in 1994 in Mexico City, it was conceptualized as a company dedicated to the treatment of wastewater, initially with the manufacture of biodigesters; over time it developed its own designs of treatment plants and that is where it began its adventure in the construction of turnkey projects. With a long trajectory in the water treatment sector for the hotel industry in Cancun and the Riviera Maya, it decided to venture into the design and construction of swimming pools for the same industry; this is how the construction began to develop naturally. In 2004 the company internationalizes with the incursion into the Jamaican tourist market and it is there where the formalization of the construction company takes place. With it we have entered other construction markets in general such as the development of housing developments, industrial buildings, apartment buildings, residences, and of course swimming pools and wastewater treatment plants.

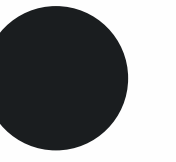

Our Services

A range of services
to suit your
convenience

For conserving our quality/warranty service, we have a *strategic location system* that leads us to have offices in each country where the projects are being developed. We are present in **Mexico, Costa Rica, Dominican Republic and Jamaica.**

Our Services
